

ETECNIC MOVILIDAD ELÉCTRICA, S.L.

SECURITY POLICY

ETECNIC MOVILIDAD ELÉCTRICA, S.L. considers Security a strategic element for the development of its business activities and for building trust with customers, public authorities, partners, and other stakeholders.

The company is committed to protecting its information, systems, and services against internal and external threats, whether accidental or deliberate, ensuring the reliability, integrity, availability, and appropriate use of its assets.

Security is integrated into ETECNIC's Integrated Management System and is managed through a risk-based approach, focused on prevention, resilience, and business continuity. This approach enables the organization to identify, assess, and manage risks that may affect its operations, services, and stakeholders.

ETECNIC embeds security as a cross-cutting principle throughout the lifecycle of its systems and services, from design and acquisition to operation and maintenance, as well as in its relationships with suppliers and third parties.

The organization is committed to complying with all applicable legal, regulatory, and contractual requirements, and to aligning with recognized standards and frameworks related to security and information protection, including the Spanish National Security Framework (ENS) and the ISO/IEC 27001 standard.

Management actively promotes a strong security culture, based on individual responsibility, awareness, and continuous improvement, recognizing people as a key factor in protecting the organization and its stakeholders.

This commitment is reviewed periodically to ensure the effectiveness, adequacy, and continuous improvement of ETECNIC's security management practices.
